Mandatory Homework and Recitation

1. Homework

Homework is on the web site. Use your web browser, i.e., Explorer; to reach http://www.masteringphysics.com

Your textbook is included in your student access kit in which you have your unique ID for the Web.

READ the INSTRUCTIONS in the access kit.

Class is MPSOJKA0021

Your class ID is your A-number, for exams, quizzes, and laboratory quizzes use the last 4 digits of your A-number.

So, did you read the instructions? 
Do not come to the instructor with a dumb question; protect yourself—Read it.

First time user: Follow the registering instructions for the class procedure. Go to our weekly assignments. There is a first assignment that is mandatory. This extra assignment introduces you to the web system and how Mastering Physics needs you to input your answers; this is not graded.

On CANVAS in the weekly MODULES a file homework questions and the due date and time. These are usually set for Monday at 1.00 a.m. After a Monday holiday or exam I usually set the date to the Tuesday.

Late homework is accepted but at a reduced percentage; see web site.

2. Recitation

The recitation session, Thursday each week, begins with a quiz. These quizzes are graded and contribute to your final class grade.

The recitation quiz is closed book.

After the quiz the TA will work though the exam like questions, true/false, multiple choice, and problem that are posted on CANVAS in the appropriate weekly MODULE. These questions are set after each lecture to provide a sample of questions that relate to that lectures concepts and contents.

During this period of the recitation student questions about class work and homework will also be addressed by the TA.
3. Lecture Summaries

On Canvas under there are weekly modules and within each are summaries of the lecture. These are available prior to the lecture. They contain spaces where you can readily write equations, sketch diagrams, or doodle. They are in Microsoft Word format.
